

Densenet201 Single/Multiple Hotspot Evaluation

Seyed Rumaiz

January 7, 2026

1 Model Evaluation

1.1 Confusion Matrix

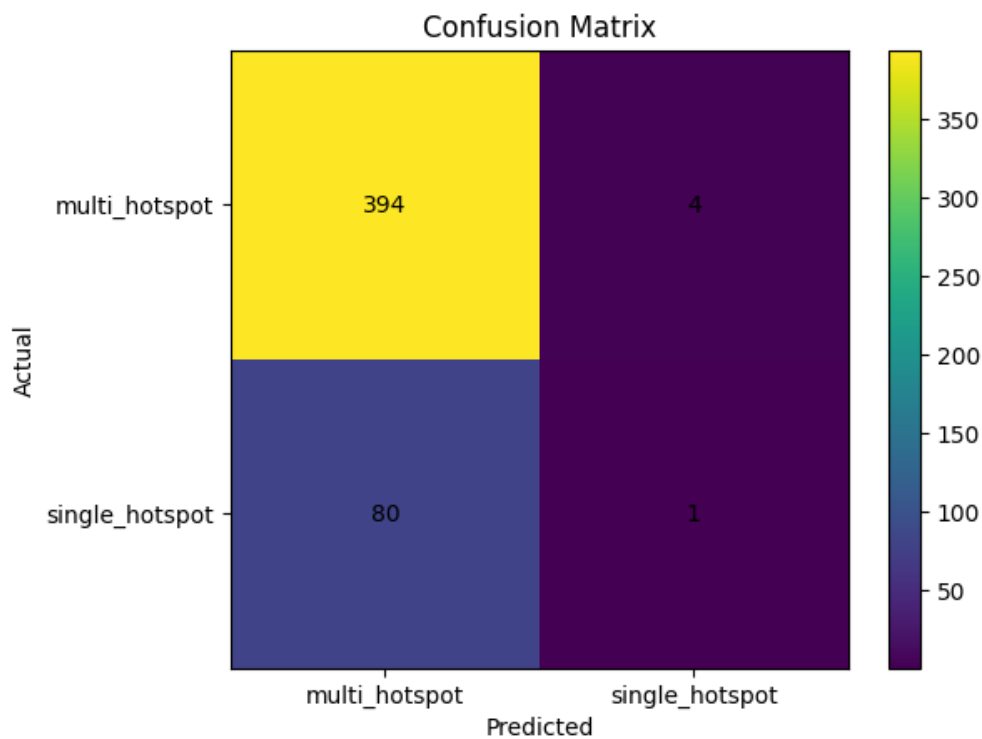

Figure 1: Confusion matrix showing the performance of the hotspot classification model. The model performs well for multiple hotspots but poorly for single hotspots

1.2 Classification Report

	precision	recall	f1-score	support
multi_hotspot	0.83	0.99	0.90	398
single_hotspot	0.20	0.01	0.02	81
accuracy			0.82	479
macro avg	0.52	0.50	0.46	479
weighted avg	0.72	0.82	0.75	479

Confusion Matrix (raw values):

3944801

AUC Score: 0.515

1.3 ROC Curve

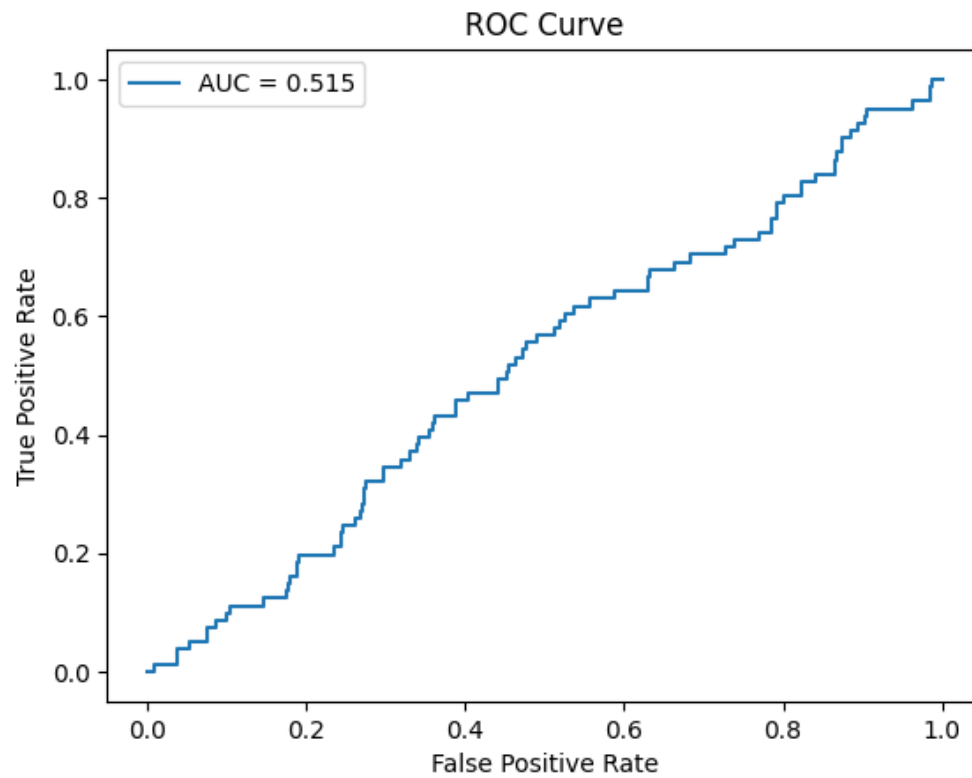

Figure 2: ROC curve for the hotspot classification model. The AUC value indicates the model barely performs better than random guessing.
